Scanner et rayons X (French Edition) A. Lisbonne

L'EMC souhaite valoriser le tome de sa collection de radiologie et d'imagerie médicale dédié aux principes et techniques et à la radioprotection (Radio VI). En effet, ce volume de technique et de technologie se vend sur le modèle commercial de l'EMC (équipe force de vente). Or, certaines parties de ce tome pourraient vivement intéresser les manipulateurs radio, public qui n'est pas touché par les forces de ventes EMC.

L'idée de ce partenariat EMC-livres est de reprendre les textes parus ou en projet pour radio VI, de les réorganiser en thématiques, de les actualiser et d'en faire un livre.

Le premier volume ici proposé est consacré au scanner et à la technologie des rayons X. La thématique a été validée par le directeur scientifique de l'EMC en imagerie, le Pr Hélénon et par le conseiller éditorial d'imagerie pour les livres, le Pr Bléry.

Il vient combler un vide parmi nos ouvrages d'imagerie de formation puisque notre livre consacré au scanner, ""Scanner à rayons X"", du Pr Doyon (2000) est désormais obsolète et ne sera jamais réactualisé.

Cet ouvrage serait consacré uniquement à la technique du scanner (tubes à rayons X, formation de l'image, etc.). La clinique ne serait pas traitée.

Il correspondrait à 5 articles EMC.
