## **Biocode: The New Age of Genomics** Dawn Field, Neil Davies

The living world runs on genomic software - what Dawn Field and Neil Davies call the 'biocode' - the sum of all DNA on Earth. In Biocode, they tell the story of a new age of scientific discovery: the growing global effort to read and map the biocode, and what that might mean for the future. The structure of DNA was identified in 1953, and the whole human genome was mapped by 2003. Since then the new field of genomics has mushroomed and is now operating on an industrial scale. Genomes can now be sequenced rapidly and increasingly cheaply. The genomes of large numbers of organisms from mammals to microbes, have been mapped. Getting your genome sequenced is becoming affordable for many. You too can check paternity, find out where your ancestors came from, or whether you are at risk of some diseases. Some check out the pedigree of their pets, while others turn genomes into art. A stray hair is enough to crudely reconstruct the face of the owner. From reading to constructing: the first steps to creating artificial life have already been taken.

Some may find the rapidity of developments, and the potential for misuse, alarming. But they also open up unprecedented possibilities. The ability to read DNA has changed how we view ourselves and understand our place in nature. From the largest oceans, to the insides of our guts, we are able to explore the biosphere as never before, from the genome up. Sequencing technology has made the invisible world of microbes visible, and biodiversity genomics is revealing whole new worlds within us and without. The findings are transformational: we are all ecosystems now. Already the first efforts at 'barcoding' entire ecological communities and creating 'genomic observatories' have begun. The future, the authors argue, will involve biocoding the entire planet.

### From reader reviews:

#### **Brenda Wright:**

Book is to be different for each and every grade. Book for children right up until adult are different content. We all know that that book is very important usually. The book Biocode: The New Age of Genomics ended up being making you to know about other information and of course you can take more information. It is rather advantages for you. The book Biocode: The New Age of Genomics is not only giving you much more new information but also to become your friend when you truly feel bored. You can spend your own spend time to read your guide. Try to make relationship using the book Biocode: The New Age of Genomics. You never feel lose out for everything in case you read some books.

#### **Anthony Brown:**

The book Biocode: The New Age of Genomics has a lot of information on it. So when you check out this book you can get a lot of benefit. The book was published by the very famous author. Mcdougal makes some research before write this book. This particular book very easy to read you can get the point easily after scanning this book.

#### **Edward Carroll:**

Do you like reading a reserve? Confuse to looking for your selected book? Or your book has been rare? Why so many concern for the book? But virtually any people feel that they enjoy with regard to reading. Some people likes reading, not only science book but in addition novel and Biocode: The New Age of Genomics as well as others sources were given information for you. After you know how the truly amazing a book, you feel want to read more and more. Science publication was created for teacher or students especially. Those publications are helping them to bring their knowledge. In additional case, beside science reserve, any other book likes Biocode: The New Age of Genomics to make your spare time more colorful. Many types of book like here.

#### **George Tucker:**

A lot of people said that they feel weary when they reading a book. They are directly felt this when they get a half elements of the book. You can choose the particular book Biocode: The New Age of Genomics to make your current reading is interesting. Your own skill of reading proficiency is developing when you such as reading. Try to choose basic book to make you enjoy you just read it and mingle the idea about book and reading especially. It is to be initially opinion for you to like to open up a book and read it. Beside that the publication Biocode: The New Age of Genomics can to be your brand-new friend when you're sense alone and confuse in doing what must you're doing of their time.
