Anaerobic Bacteriology: Clinical and Laboratory Practice A. Trevor Willis

Anaerobic Bacteriology: Clinical and Laboratory Practice, Third edition discusses the importance of the non-sporing anaerobic bacteria as a significant cause of infection in man.

This edition updates the anaerobic methodology, systematics, and ecological and pathogenetic associations of the non-sporing anaerobes. The descriptive bacteriology of the non-clostridial anaerobes and clinical syndromes produced by them in man are also considered.

Other topics discussed include the anaerobic jar, inoculation of media, and antibiotic susceptibility testing of anaerobes. The histotoxic clostridia of infected wounds, anaerobic cocci, and infections related to the gastrointestinal tract are also elaborated. This text likewise covers the uterine gas gangrenous infections and other clostridial infections.

This book is a good source for medical practitioners, clinicians, and medical students concerned with anaerobic bacteria.
