Over the years researchers have reported solubility data in the chemical, pharmaceutical, engineering, and environmental literature for several thousand organic compounds. Until now, this information has been scattered throughout the literature. Containing over 16,000 solubility data points for more than 4,000 organic compounds, Handbook of Aqueous Solubility Data provides an extensive compilation of published aqueous solubility data for a wide variety of organic nonelectrolytes and unionized weak electrolytes. It includes data for pharmaceuticals, pollutants, nutrients, herbicides, pesticides, agricultural, industrial, and energy related compounds.

Each compound is identified by a sequential number along with molecular formula, compound name, synonyms, molecular weight, CAS Registry Number, melting point, and boiling point if available. Each entry has a five-point evaluation score for the quality of the reporting of the data, along with the full citation, and comments from the authors when necessary. The user-friendly format gives a clear depiction of each piece of solubility data with enough information to estimate its validity. Handbook of Aqueous Solubility Data gives you a portable, accessible resource for solubility data of numerous compounds and a single system for the evaluation of the data supplied.
