## **Soil Conservation Service Curve Number (SCS-CN) Methodology (Water Science and Technology Library) S.K. Mishra, Vijay Singh**

The Soil Conservation Service (SCS) curve number (CN) method is one of the most popular methods for computing the runoff volume from a rainstorm. It is popular because it is simple, easy to understand and apply, and stable, and accounts for most of the runoff producing watershed characteristics, such as soil type, land use, hydrologic condition, and antecedent moisture condition. The SCS-CN method was originally developed for its use on small agricultural watersheds and has since been extended and applied to rural, forest and urban watersheds. Since the inception of the method, it has been applied to a wide range of environments. In recent years, the method has received much attention in the hydrologic literature. The SCS-CN method was first published in 1956 in Section-4 of the National Engineering Handbook of Soil Conservation Service (now called the Natural Resources Conservation Service), U. S. Department of Agriculture. The publication has since been revised several times. However, the contents of the methodology have been nonetheless more or less the same. Being an agency methodology, the method has not passed through the process of a peer review and is, in general, accepted in the form it exists. Despite several limitations of the method and even questionable credibility at times, it has been in continuous use for the simple reason that it works fairly well at the field level.

### **From reader reviews:**

#### **Richard Glass:**

Book is to be different per grade. Book for children until adult are different content. We all know that that book is very important for us. The book Soil Conservation Service Curve Number (SCS-CN) Methodology (Water Science and Technology Library) seemed to be making you to know about other knowledge and of course you can take more information. It is rather advantages for you. The book Soil Conservation Service Curve Number (SCS-CN) Methodology (Water Science and Technology Library) is not only giving you far more new information but also being your friend when you truly feel bored. You can spend your personal spend time to read your guide. Try to make relationship while using book Soil Conservation Service Curve Number (SCS-CN) Methodology (Water Science and Technology Library). You never experience lose out for everything in case you read some books.

#### **Stephan Partin:**

A lot of people always spent their particular free time to vacation or maybe go to the outside with them family or their friend. Do you know? Many a lot of people spent they will free time just watching TV, or maybe playing video games all day long. If you would like try to find a new activity this is look different you can read a new book. It is really fun in your case. If you enjoy the book which you read you can spent all day every day to reading a guide. The book Soil Conservation Service Curve Number (SCS-CN) Methodology (Water Science and Technology Library) it is rather good to read. There are a lot of people that recommended this book. These people were enjoying reading this book. If you did not have enough space to create this book you can buy the actual e-book. You can m0ore effortlessly to read this book from the smart phone. The price is not to cover but this book offers high quality.

#### **Cynthia Miller:**

People live in this new day time of lifestyle always try and and must have the spare time or they will get great deal of stress from both lifestyle and work. So , once we ask do people have spare time, we will say absolutely yes. People is human not only a robot. Then we ask again, what kind of activity do you possess when the spare time coming to an individual of course your answer can unlimited right. Then do you try this one, reading ebooks. It can be your alternative in spending your spare time, the actual book you have read is Soil Conservation Service Curve Number (SCS-CN) Methodology (Water Science and Technology Library).

#### **Dona Henry:**

This Soil Conservation Service Curve Number (SCS-CN) Methodology (Water Science and Technology Library) is great guide for you because the content which can be full of information for you who always deal with world and still have to make decision every minute. This particular book reveal it facts accurately using great arrange word or we can state no rambling sentences within it. So if you are read the idea hurriedly you can have whole details in it. Doesn't mean it only gives you straight forward sentences but tough core

information with beautiful delivering sentences. Having Soil Conservation Service Curve Number (SCS-CN) Methodology (Water Science and Technology Library) in your hand like keeping the world in your arm, info in it is not ridiculous 1. We can say that no book that offer you world in ten or fifteen small right but this publication already do that. So , it is good reading book. Heya Mr. and Mrs. occupied do you still doubt this?
