For the Good of Mankind?: The Shameful History of Human Medical Experimentation Vicki Oransky Wittenstein

Experiment: A child is deliberately infected with the deadly smallpox disease without his parents' informed consent. Result: The world's first vaccine. Experiment: A slave woman is forced to undergo more than thirty operations without anesthesia. Result: The beginnings of modern gynecology. Incidents like these paved the way for crucial, lifesaving medical discoveries. But they also harmed and humiliated their test subjects, many of whom did not agree to the experiments in the first place. How do doctors balance the need to test new medicines and procedures with their ethical duty to protect the rights of human subjects? Take a harrowing journey through some of history's greatest medical advances—and its most horrifying medical atrocities—to discover how human suffering has gone hand in hand with medical advancement.
