Determination of Beta-Blockers in Biological Material: Evaluation of Analytical Methods in Biological Systems (Techniques and Instrumentation in Analytical Chemistry)

Determination of Beta-Blockers in Biological Material: Evaluation of Analytical Methods in Biological Systems (Techniques and Instrumentation in Analytical Chemistry)

This is the third volume of a sub-series entitled Evaluation of Analytical Methods in Biological Systems. (The first two were Analysis of Biogenic Amines edited by G.B. Baker and R.T. Coutts, and Hazardous Metals in Human Toxicology edited by A. Vercruysse).

This latest volume addresses beta-blockers - an area of research for which a Nobel Prize in Medicine was awarded in 1988. It provides an up-to-date and comprehensive coverage of the theory and practice of the determination of beta-blockers in biological material. Two main fields of research are dealt with in this book: analytical chemistry and pharmacology, and, as it deals with drugs used in clinical practice, it is also related to a third area: therapy. Thus, it offers relevant information to workers in all three fields.

Some 50 beta-blockers are discussed, and nine methods of analysis. The methods are divided into three groups: optical, chromatographic, and saturation methods. In addition to the analytical methods themselves, sample handling problems are also discussed in detail, as is the information content of the analytical results obtained. Special chapters are directed towards those working in pharmacology and pharmacokinetics. Finally, as recent evidence points to the increased importance of distinguishing optical isomers of drugs, a chapter on the determination of optical isomers of beta-blockers in biological material is also included. An extensive subject index and two supplements giving retention indices and structures of beta-blockers complete the book.

This is the first book to treat beta-blockers from the point of view of their determination and to discuss in detail the use of analytical methods for beta-blockers. It will thus appeal to a wide-ranging readership.

From reader reviews:

Ann Wheeler:

Your reading sixth sense will not betray an individual, why because this Determination of Beta-Blockers in Biological Material: Evaluation of Analytical Methods in Biological Systems (Techniques and Instrumentation in Analytical Chemistry) guide written by well-known writer we are excited for well how to make book that could be understand by anyone who also read the book. Written with good manner for you, still dripping wet every ideas and composing skill only for eliminate your own personal hunger then you still hesitation Determination of Beta-Blockers in Biological Material: Evaluation of Analytical Methods in Biological Systems (Techniques and Instrumentation in Analytical Chemistry) as good book but not only by the cover but also through the content. This is one reserve that can break don't assess book by its protect, so do you still needing an additional sixth sense to pick that!?! Oh come on your reading through sixth sense already told you so why you have to listening to yet another sixth sense.

Maryann Carson:

Many people spending their time by playing outside using friends, fun activity using family or just watching TV 24 hours a day. You can have new activity to pay your whole day by reading a book. Ugh, do you think reading a book can actually hard because you have to bring the book everywhere? It alright you can have the e-book, taking everywhere you want in your Cell phone. Like Determination of Beta-Blockers in Biological Material: Evaluation of Analytical Methods in Biological Systems (Techniques and Instrumentation in Analytical Chemistry) which is getting the e-book version. So , try out this book? Let's notice.

Louise Guest:

As a scholar exactly feel bored to help reading. If their teacher requested them to go to the library or to make summary for some book, they are complained. Just small students that has reading's heart or real their passion. They just do what the teacher want, like asked to go to the library. They go to generally there but nothing reading seriously. Any students feel that looking at is not important, boring and also can't see colorful photographs on there. Yeah, it is to get complicated. Book is very important for yourself. As we know that on this era, many ways to get whatever you want. Likewise word says, ways to reach Chinese's country. Therefore , this Determination of Beta-Blockers in Biological Material: Evaluation of Analytical Methods in Biological Systems (Techniques and Instrumentation in Analytical Chemistry) can make you really feel more interested to read.

Herbert Oakley:

Reserve is one of source of understanding. We can add our information from it. Not only for students but in addition native or citizen need book to know the change information of year to help year. As we know those publications have many advantages. Beside we all add our knowledge, may also bring us to around the world. By the book Determination of Beta-Blockers in Biological Material: Evaluation of Analytical

Methods in Biological Systems (Techniques and Instrumentation in Analytical Chemistry) we can consider more advantage. Don't you to definitely be creative people? For being creative person must like to read a book. Only choose the best book that suited with your aim. Don't always be doubt to change your life with that book Determination of Beta-Blockers in Biological Material: Evaluation of Analytical Methods in Biological Systems (Techniques and Instrumentation in Analytical Chemistry). You can more appealing than now.
