Translated for the first time into English, the history of the German autonomous anticapitalist movement is traced back to the 1970s in this firsthand account. Battling police in riot gear, the early members of the autonomous movement used military tactics that included barricading and hurling Molotov cocktails in protest. Dubbed the “Black Bloc” by the German media, those tactics were soon adopted by scores of anticapitalist groups across the globe. The dawn of the autonomous faction spawned a movement in which average citizens can reclaim their lives from governmental control. Political activists and anticapitalists will find updated historical context to the movement and the current state of the German autonomous movement in this updated chronicle.
