Life in the Cape York Rainforest

Robert Heinsohn, Michael Cermak

Life in the Cape York Rainforest Robert Heinsohn, Michael Cermak

The remote, beautiful and poorly known rainforests of Cape York Peninsula tell a special story about Australia's historic and present-day connections to New Guinea. Life in the Cape York Rainforest highlights these connections by examining the fascinating biology of some of the most spectacular animals shared between the two regions.

The author recounts his own ground-breaking research on 'cross-dressing' Eclectus parrots, musical palm cockatoos and multi-coloured pythons, together with the exotic lifestyles of other animals, while painting the bigger picture of the past when Australia and New Guinea were joined by extensive land bridges. Australia's disconnection from New Guinea is probably only temporary, and even today many bird species continue to fly the short distance between the two landmasses.

Whether just browsing the beautiful photos and informative captions, or reading it in its entirety, readers will gain a greater understanding of the unique attributes of our Cape York rainforests.
