Crystallography Made Crystal Clear: A Guide for Users of Macromolecular Models (Complementary Science) Gale Rhodes

Crystallography Made Crystal Clear makes crystallography accessible to readers who have no prior knowledge of the field or its mathematical basis. This is the most comprehensive and concise reference for beginning Macromolecular crystallographers, written by a leading expert in the field. Rhodes' uses visual and geometric models to help readers understand the mathematics that form the basis of x-ray crystallography. He has invested a great deal of time and effort on World Wide Web tools for users of models, including beginning-level tutorials in molecular modeling on personal computers. Rhodes' personal CMCC Home Page also provides access to tools and links to resources discussed in the text. Most significantly, the final chapter introduces the reader to macromolecular modeling on personal computers-*featuring SwissPdbViewer*, a free, powerful modeling program now available for PC, Power Macintosh, and Unix computers. This updated and expanded new edition uses attractive four-color art, web tool access for further study, and concise language to explain the basis of X-ray crystallography, increasingly vital in today's research labs.

- * Helps readers to understand where models come from, so they don't use them blindly and inappropriately
- * Provides many visual and geometric models for understanding a largely mathematical method
- * Allows readers to judge whether recently published models are of sufficiently high quality and detail to be useful in their own work
- * Allows readers to study macromolecular structure independently and in an open-ended fashion on their own computers, without being limited to textbook or journals illustrations
- * Provides access to web tools in a format that will not go out of date. Links will be updated and added as existing resources change location or are added

From reader reviews:

Martina Joseph:

In other case, little individuals like to read book Crystallography Made Crystal Clear: A Guide for Users of Macromolecular Models (Complementary Science). You can choose the best book if you like reading a book. Providing we know about how is important some sort of book Crystallography Made Crystal Clear: A Guide for Users of Macromolecular Models (Complementary Science). You can add information and of course you can around the world with a book. Absolutely right, simply because from book you can know everything! From your country until eventually foreign or abroad you can be known. About simple point until wonderful thing you may know that. In this era, you can open a book as well as searching by internet system. It is called e-book. You may use it when you feel bored to go to the library. Let's read.

Debra Rubino:

Book is to be different for every single grade. Book for children till adult are different content. As you may know that book is very important for all of us. The book Crystallography Made Crystal Clear: A Guide for Users of Macromolecular Models (Complementary Science) had been making you to know about other know-how and of course you can take more information. It doesn't matter what advantages for you. The publication Crystallography Made Crystal Clear: A Guide for Users of Macromolecular Models (Complementary Science) is not only giving you more new information but also for being your friend when you sense bored. You can spend your personal spend time to read your e-book. Try to make relationship with all the book Crystallography Made Crystal Clear: A Guide for Users of Macromolecular Models (Complementary Science). You never really feel lose out for everything in case you read some books.

Ruth Santiago:

This book untitled Crystallography Made Crystal Clear: A Guide for Users of Macromolecular Models (Complementary Science) to be one of several books this best seller in this year, honestly, that is because when you read this e-book you can get a lot of benefit onto it. You will easily to buy this kind of book in the book store or you can order it by way of online. The publisher of the book sells the e-book too. It makes you easier to read this book, as you can read this book in your Smart phone. So there is no reason to you personally to past this publication from your list.

Mary Jones:

Playing with family inside a park, coming to see the sea world or hanging out with close friends is thing that usually you might have done when you have spare time, and then why you don't try point that really opposite from that. 1 activity that make you not sense tired but still relaxing, trilling like on roller coaster you have been ride on and with addition of information. Even you love Crystallography Made Crystal Clear: A Guide for Users of Macromolecular Models (Complementary Science), you may enjoy both. It is excellent combination right, you still wish to miss it? What kind of hang type is it? Oh can happen its mind hangout

people. What? Still don't get it, oh come on its called reading friends.
