In Praise of Simple Physics: The Science and Mathematics behind Everyday Questions Paul J. Nahin

Physics can explain many of the things that we commonly encounter. It can tell us why the night is dark, what causes the tides, and even how best to catch a baseball. With *In Praise of Simple Physics*, popular math and science writer Paul Nahin presents a plethora of situations that explore the science and math behind the wonders of everyday life. Roaming through a diverse range of puzzles, he illustrates how physics shows us ways to wring more energy from renewable sources, to measure the gravity in our car garages, to figure out which of three light switches in the basement controls the light bulb in the attic, and much, much more.

How fast can you travel from London to Paris? How do scientists calculate the energy of an atomic bomb explosion? How do you kick a football so it stays in the air and goes a long way downfield? Nahin begins with simpler problems and progresses to more challenging questions, and his entertaining, accessible, and scientifically and mathematically informed explanations are all punctuated by his trademark humor. Readers are presumed to have some background in beginning differential and integral calculus. Whether you simply have a personal interest in physics' influence in the world or you're an engineering and science student who wants to gain more physics know-how, this book has an intriguing scenario for you.

In Praise of Simple Physics proves that if we look carefully at the world around us, physics has answers for the most astonishing day-to-day occurrences.

From reader reviews:

Aaron Mullen:

Do you have favorite book? If you have, what is your favorite's book? Book is very important thing for us to be aware of everything in the world. Each book has different aim or maybe goal; it means that guide has different type. Some people really feel enjoy to spend their a chance to read a book. They may be reading whatever they take because their hobby is usually reading a book. Why not the person who don't like examining a book? Sometime, particular person feel need book if they found difficult problem or exercise. Well, probably you will want this In Praise of Simple Physics: The Science and Mathematics behind Everyday Questions.

Van Gee:

Often the book In Praise of Simple Physics: The Science and Mathematics behind Everyday Questions will bring that you the new experience of reading a new book. The author style to explain the idea is very unique. In the event you try to find new book to learn, this book very suited to you. The book In Praise of Simple Physics: The Science and Mathematics behind Everyday Questions is much recommended to you to see. You can also get the e-book through the official web site, so you can more easily to read the book.

Dana Martin:

Reading a book for being new life style in this calendar year; every people loves to learn a book. When you read a book you can get a wide range of benefit. When you read guides, you can improve your knowledge, mainly because book has a lot of information into it. The information that you will get depend on what types of book that you have read. If you want to get information about your study, you can read education books, but if you want to entertain yourself you are able to a fiction books, such us novel, comics, along with soon. The In Praise of Simple Physics: The Science and Mathematics behind Everyday Questions provide you with new experience in examining a book.

Gary Muldowney:

Reading a book make you to get more knowledge from this. You can take knowledge and information from a book. Book is composed or printed or descriptive from each source which filled update of news. In this modern era like today, many ways to get information are available for anyone. From media social including newspaper, magazines, science e-book, encyclopedia, reference book, novel and comic. You can add your understanding by that book. Isn't it time to spend your spare time to open your book? Or just looking for the In Praise of Simple Physics: The Science and Mathematics behind Everyday Questions when you required it?
