**How to Design, Analyse and Report Cluster Randomised Trials in Medicine and Health Related Research (Statistics in Practice)** Michael J. Campbell, Stephen J. Walters  
**A complete guide to understanding cluster randomised trials**

Written by two researchers with extensive experience in the field, this book presents a complete guide to the design, analysis and reporting of cluster randomised trials. It spans a wide range of applications: trials in developing countries, trials in primary care, trials in the health services. A key feature is the use of R code and code from other popular packages to plan and analyse cluster trials, using data from actual trials. The book contains clear technical descriptions of the models used, and considers in detail the ethics involved in such trials and the problems in planning them. For readers and students who do not intend to run a trial but wish to be a critical reader of the literature, there are sections on the CONSORT statement, and exercises in reading published trials.

- Written in a clear, accessible style
- Features real examples taken from the authors' extensive practitioner experience of designing and analysing clinical trials
- Demonstrates the use of R, Stata and SPSS for statistical analysis
- Includes computer code so the reader can replicate all the analyses
- Discusses neglected areas such as ethics and practical issues in running cluster randomised trials

*How to Design, Analyse and Report Cluster Randomised Trials in Medicine and Health Related Research* provides an excellent reference tool and can be read with profit by statisticians, health services researchers, systematic reviewers and critical readers of cluster randomised trials.

**From reader reviews:**

**Cheryl Fenske:**

In this 21st centuries, people become competitive in most way. By being competitive at this point, people have do something to make these people survives, being in the middle of the crowded place and notice by means of surrounding. One thing that occasionally many people have underestimated the item for a while is reading. Yep, by reading a book your ability to survive enhance then having chance to endure than other is high. For you who want to start reading some sort of book, we give you this specific How to Design, Analyse and Report Cluster Randomised Trials in Medicine and Health Related Research (Statistics in Practice) book as beginning and daily reading reserve. Why, because this book is more than just a book.

**William Pak:**

Here thing why this How to Design, Analyse and Report Cluster Randomised Trials in Medicine and Health Related Research (Statistics in Practice) are different and dependable to be yours. First of all examining a book is good but it really depends in the content from it which is the content is as delicious as food or not. How to Design, Analyse and Report Cluster Randomised Trials in Medicine and Health Related Research (Statistics in Practice) giving you information deeper including different ways, you can find any reserve out there but there is no guide that similar with How to Design, Analyse and Report Cluster Randomised Trials in Medicine and Health Related Research (Statistics in Practice). It gives you thrill reading through journey, its open up your own personal eyes about the thing this happened in the world which is might be can be happened around you. You can easily bring everywhere like in playground, café, or even in your technique home by train. For anyone who is having difficulties in bringing the branded book maybe the form of How to Design, Analyse and Report Cluster Randomised Trials in Medicine and Health Related Research (Statistics in Practice) in e-book can be your alternative.

**Bertha Boone:**

Spent a free the perfect time to be fun activity to try and do! A lot of people spent their down time with their family, or their own friends. Usually they undertaking activity like watching television, going to beach, or picnic from the park. They actually doing same every week. Do you feel it? Do you need to something different to fill your current free time/ holiday? Can be reading a book can be option to fill your cost-free time/ holiday. The first thing you ask may be what kinds of book that you should read. If you want to attempt look for book, may be the reserve untitled How to Design, Analyse and Report Cluster Randomised Trials in Medicine and Health Related Research (Statistics in Practice) can be good book to read. May be it might be best activity to you.

**Randy Jones:**

Is it an individual who having spare time in that case spend it whole day simply by watching television

programs or just laying on the bed? Do you need something new? This How to Design, Analyse and Report Cluster Randomised Trials in Medicine and Health Related Research (Statistics in Practice) can be the answer, oh how comes? A book you know. You are consequently out of date, spending your free time by reading in this fresh era is common not a geek activity. So what these textbooks have than the others?
