Biodiversity Conservation and Environmental Change: Using palaeoecology to manage dynamic landscapes in the Anthropocene Lindsey Gillson

Ecosystems today are dynamic and complex, leaving conservationists faced with the paradox of conserving moving targets. New approaches to conservation are now required that aim to conserve ecological function and process, rather than attempt to protect static snapshots of biodiversity. To do this effectively, long-term information on ecosystem variability and resilience is needed. While there is a wealth of such information in palaeoecology, archaeology, and

historical ecology, it remains an underused resource by conservation ecologists. In bringing together the disciplines of neo- and palaeoecology and integrating them with conservation biology, this novel text illustrates how an understanding of long-term change in ecosystems can in turn inform and influence their conservation and management in the Anthropocene. By looking at the history of traditional management, climate change, disturbance, and land-use, the book describes how a long-term perspective on landscape change can inform current and pressing conservation questions such as whether elephants should be culled, how best to manage fire, and whether ecosystems can or should be "re-wilded"

Biodiversity Conservation and Environmental Change is suitable for senior undergraduate and post-graduate students in conservation ecology, palaeoecology, biodiversity conservation, landscape ecology, environmental change and natural resource management. It will also be of relevance and use to a global market of conservation practitioners, researchers, educators and policy-makers.

From reader reviews:

Alexander Macdougall:

Why don't make it to be your habit? Right now, try to ready your time to do the important take action, like looking for your favorite guide and reading a reserve. Beside you can solve your condition; you can add your knowledge by the book entitled Biodiversity Conservation and Environmental Change: Using palaeoecology to manage dynamic landscapes in the Anthropocene. Try to stumble through book Biodiversity Conservation and Environmental Change: Using palaeoecology to manage dynamic landscapes in the Anthropocene as your good friend. It means that it can for being your friend when you truly feel alone and beside that of course make you smarter than previously. Yeah, it is very fortunated in your case. The book makes you more confidence because you can know everything by the book. So , we need to make new experience and knowledge with this book.

Hilton Rogers:

The actual book Biodiversity Conservation and Environmental Change: Using palaeoecology to manage dynamic landscapes in the Anthropocene will bring someone to the new experience of reading the book. The author style to explain the idea is very unique. Should you try to find new book to see, this book very ideal to you. The book Biodiversity Conservation and Environmental Change: Using palaeoecology to manage dynamic landscapes in the Anthropocene is much recommended to you to study. You can also get the e-book through the official web site, so you can quickly to read the book.

Richard Strohm:

Reading a book being new life style in this season; every people loves to learn a book. When you go through a book you can get a lot of benefit. When you read ebooks, you can improve your knowledge, due to the fact book has a lot of information into it. The information that you will get depend on what types of book that you have read. In order to get information about your analysis, you can read education books, but if you want to entertain yourself you can read a fiction books, this sort of us novel, comics, and also soon. The Biodiversity Conservation and Environmental Change: Using palaeoecology to manage dynamic landscapes in the Anthropocene will give you new experience in reading a book.

Ronnie Correa:

Reading a book make you to get more knowledge from it. You can take knowledge and information from a book. Book is written or printed or illustrated from each source this filled update of news. On this modern era like right now, many ways to get information are available for you actually. From media social like newspaper, magazines, science book, encyclopedia, reference book, new and comic. You can add your understanding by that book. Do you want to spend your spare time to open your book? Or just searching for the Biodiversity Conservation and Environmental Change: Using palaeoecology to manage dynamic landscapes in the Anthropocene when you required it?
