Handbook of Advanced Multilevel Analysis (European Association of Methodology Series)

Handbook of Advanced Multilevel Analysis (European Association of Methodology Series)

This new handbook is the definitive resource on advanced topics related to multilevel analysis. The editors assembled the top minds in the field to address the latest applications of multilevel modeling as well as the specific difficulties and methodological problems that are becoming more common as more complicated models are developed. Each chapter features examples that use actual datasets. These datasets, as well as the code to run the models, are available on the book's website <http://www.hlm-online.com>. Each chapter includes an introduction that sets the stage for the material to come and a conclusion.

Divided into five sections, the first provides a broad introduction to the field that serves as a framework for understanding the latter chapters. Part 2 focuses on multilevel latent variable modeling including item response theory and mixture modeling. Section 3 addresses models used for longitudinal data including growth curve and structural equation modeling. Special estimation problems are examined in section 4 including the difficulties involved in estimating survival analysis, Bayesian estimation, bootstrapping, multiple imputation, and complicated models, including generalized linear models, optimal design in multilevel models, and more. The book's concluding section focuses on statistical design issues encountered when doing multilevel modeling including nested designs, analyzing cross-classified models, and dyadic data analysis.

Intended for methodologists, statisticians, and researchers in a variety of fields including psychology, education, and the social and health sciences, this handbook also serves as an excellent text for graduate and PhD level courses in multilevel modeling. A basic knowledge of multilevel modeling is assumed.

From reader reviews:

Agustin Thornsberry:

Now a day those who Living in the era wherever everything reachable by connect to the internet and the resources inside it can be true or not call for people to be aware of each information they get. How a lot more to be smart in getting any information nowadays? Of course the answer is reading a book. Reading a book can help persons out of this uncertainty Information mainly this Handbook of Advanced Multilevel Analysis (European Association of Methodology Series) book because this book offers you rich data and knowledge. Of course the details in this book hundred pct guarantees there is no doubt in it you may already know.

Lydia Donaldson:

Playing with family within a park, coming to see the marine world or hanging out with good friends is thing that usually you could have done when you have spare time, after that why you don't try factor that really opposite from that. One particular activity that make you not experiencing tired but still relaxing, trilling like on roller coaster you are ride on and with addition associated with. Even you love Handbook of Advanced Multilevel Analysis (European Association of Methodology Series), you can enjoy both. It is great combination right, you still would like to miss it? What kind of hang type is it? Oh come on its mind hangout fellas. What? Still don't understand it, oh come on its called reading friends.

Barbara Gunter:

The book untitled Handbook of Advanced Multilevel Analysis (European Association of Methodology Series) contain a lot of information on the item. The writer explains your girlfriend idea with easy method. The language is very straightforward all the people, so do not necessarily worry, you can easy to read the idea. The book was written by famous author. The author will take you in the new age of literary works. It is possible to read this book because you can please read on your smart phone, or product, so you can read the book in anywhere and anytime. In a situation you wish to purchase the e-book, you can open their official web-site and order it. Have a nice read.

John Bergeron:

Reading a book make you to get more knowledge from this. You can take knowledge and information from a book. Book is published or printed or created from each source which filled update of news. On this modern era like at this point, many ways to get information are available for an individual. From media social just like newspaper, magazines, science reserve, encyclopedia, reference book, fresh and comic. You can add your understanding by that book. Are you ready to spend your spare time to open your book? Or just trying to find the Handbook of Advanced Multilevel Analysis (European Association of Methodology Series) when you essential it?
