Over the past decade, system-on-chip (SoC) designs have evolved to address the ever increasing complexity of applications, fueled by the era of digital convergence. Improvements in process technology have effectively shrunk board-level components so they can be integrated on a single chip. New on-chip communication architectures have been designed to support all inter-component communication in a SoC design. These communication architecture fabrics have a critical impact on the power consumption, performance, cost and design cycle time of modern SoC designs. As application complexity strains the communication backbone of SoC designs, academic and industrial R&D efforts and dollars are increasingly focused on communication architecture design.

This book is a comprehensive reference on concepts, research and trends in on-chip communication architecture design. It will provide readers with a comprehensive survey, not available elsewhere, of all current standards for on-chip communication architectures.

KEY FEATURES

* A definitive guide to on-chip communication architectures, explaining key concepts, surveying research efforts and predicting future trends

* Detailed analysis of all popular standards for on-chip communication architectures

* Comprehensive survey of all research on communication architectures, covering a wide range of topics relevant to this area, spanning the past several years, and up to date with the most current research efforts * Future trends that with have a significant impact on research and design of communication architectures over the next several years

From reader reviews:

Nydia Kelly:

Inside other case, little persons like to read book On-Chip Communication Architectures: System on Chip Interconnect (Systems on Silicon). You can choose the best book if you like reading a book. Provided that we know about how is important some sort of book On-Chip Communication Architectures: System on Chip Interconnect (Systems on Silicon). You can add knowledge and of course you can around the world by just a book. Absolutely right, because from book you can know everything! From your country until finally foreign or abroad you will end up known. About simple point until wonderful thing you could know that. In this era, we could open a book or searching by internet device. It is called e-book. You can utilize it when you feel bored to go to the library. Let's go through.

Rita Kirby:

In this 21st century, people become competitive in every single way. By being competitive currently, people have do something to make these people survives, being in the middle of the particular crowded place and notice by means of surrounding. One thing that sometimes many people have underestimated it for a while is reading. Yep, by reading a publication your ability to survive enhance then having chance to stand up than other is high. For you who want to start reading a new book, we give you this particular On-Chip Communication Architectures: System on Chip Interconnect (Systems on Silicon) book as starter and daily reading reserve. Why, because this book is more than just a book.

Richard Martinez:

Your reading 6th sense will not betray a person, why because this On-Chip Communication Architectures: System on Chip Interconnect (Systems on Silicon) book written by well-known writer we are excited for well how to make book which might be understand by anyone who also read the book. Written inside good manner for you, still dripping wet every ideas and producing skill only for eliminate your personal hunger then you still skepticism On-Chip Communication Architectures: System on Chip Interconnect (Systems on Silicon) as good book not only by the cover but also by the content. This is one book that can break don't evaluate book by its protect, so do you still needing one more sixth sense to pick this kind of!? Oh come on your looking at sixth sense already alerted you so why you have to listening to a different sixth sense.

Joseph Russell:

Book is one of source of understanding. We can add our understanding from it. Not only for students but additionally native or citizen will need book to know the up-date information of year to be able to year. As we know those textbooks have many advantages. Beside we all add our knowledge, also can bring us to around the world. By book On-Chip Communication Architectures: System on Chip Interconnect (Systems on Silicon) we can get more advantage. Don't you to definitely be creative people? For being creative person must want to read a book. Just simply choose the best book that suited with your aim. Don't end up being

doubt to change your life at this book On-Chip Communication Architectures: System on Chip Interconnect (Systems on Silicon). You can more appealing than now.
