## **Testicular Tangrams: 12th European Workshop on Molecular and Cellular Endocrinology of the Testis (Ernst Schering Foundation Symposium Proceedings / Schering ... Symposium Proceedings Supplements)**

During the past two decades research on the testis has created a vast number of publications. New techniques, such as cell and gene cloning, germ cell manipulation and transplantation, as well as gene expression, have surpassed the classical approaches that involved studies on receptor activation and endocrine, paracrine and autocrine regulatory mechanisms. Due to the expansion of this field of research it has become increasingly difficult to integrate the large number of observations and relate them to the physiology and pathophysiology of the testis. More emphasis must, therefore, be put on the integration of isolated findings and the construction of the total picture. In order to stimulate this specific mental activity we have named this book Testicular Tangram. We hope that the chapters in this book will be used as pieces of the testicular puzzle and that the reader enjoys composing new shapes. The chapters of this book are representative of the plenary lectures presented at the 12th European Workshop on Molecular and Cellular Endocrinology of the Testis held in Doorwerth The Netherlands, from April 6 - 10, 2002. Publication of this book has been made possible by the generous support of the Ernst Schering Research Foundation. We would also like to thank the distinguished scientists, who have provided us with their excellent manuscripts well before the start of the Workshop. We acknowledge the help of Dr. U. -F. Habenicht, Dr. M.
